## Supporting Students

Our Practice teaches Medical Students from Keele University School of Medicine, helping them to develop a variety of skills including how to consult with patients.

Each year we teach a combination of Year 3 and Year 5 students. Year 3 students have a 4 week placement with us and Year 5 students have a 15 week placement. During this time they need to consult with a large variety of patients to develop their skills and experience on their way to qualification as a Doctor.

---

Thank you for agreeing to see a Medical Student today. The student will ask the questions usually asked by the GP and may also examine you if required. This will be very similar to a GP consultation except that the GP may not be present when you talk to the student but will see you straight after.

The GP will be supervising the student, have overall responsibility for your consultation today and will be responsible for all decisions about your care as usual.

During some consultations, the student may ask for your consent to video record the proceedings. This is to enable the student to review their performance with a Doctor either at the Practice or in external training sessions, so they can receive appropriate feedback and learning. You will be asked to sign a separate consent form in the event of this being requested.

---

Please also note that:

- You can refuse to see the student.
- You can ask the student to stop at any time.
- You can leave the consultation at any time.
- You can ask for the GP to take over at any time.

Please be assured that the care you receive from the Practice will not be affected in any way by you choosing one of these options.

Thank you for helping us today. If you have any further questions, please speak to our Receptionist or your Doctor.
